

UC-TS003

UNICORN-COMPUTER

VIDEO OUT S-VIDEO OUT VGA INPUT VGA OUTPUT

The UC-TS003 video kit is designed for PC to TV application. It only requires a standard VGA output connector (D-SUB 15PIN, MALE) and 5Volts power (from 2.54 pitch connector, which is the same with the standard 1.44" floppy disk drive's power connector).

The position of television is adjustable by hardware switch, the position will be save when push "SAVE" key. UC-TS003 will load the position automatically on next time.
